D2.3 Report on local training seminars

FINAL VERSION

Author: CRES

Date: FEBRUARY 2017

Executive Summary

Local training was aimed at training officers, policy makers and relevant key actors of at least 5 Municipalities in their area (in total at least 40 Municipalities). The training used material developed within the project gathering experience from best practices across Europe based on all available knowledge, and following the structure and contents proposed by the consortium in the beginning of the project (D2.1), but also taking into account the special needs of the municipalities in each partner's area.

Local training followed Centralised Training of the project. Firstly, the project partners organized internal training courses for their colleagues, in order to share the content of the 3 centralised trainings and to better understand and assist the EnM+SEAP procedure developed within the EnM Municipalities and beyond.

The training process for the EnM-Municipalities participating has been a key core of the development of the project, leading to the training of representatives from 76 individual municipalities (+ 1 Federation of 11 Municipalities in Italy + 15 intercommunity authorities in France). In total, 64 Local training seminars were held in all 8 Project countries: 24 in Italy, 8 in Greece, 3 in Latvia, 3 in Bulgaria, 12 in Romania, 2 in Poland, 2 in Spain, 9 in France).
